

TRINITY NEWS

WEEK 10. Last Sunday after Epiphany. March 3, 2019

Did you see the full moon last week? I suspect we all gaze on the same moon no matter which country we are in. The moonlight here down under in Australia lit up the night bright enough to cast shadows. Approaching Lent can seem to be a darker season of the church year, however, when your eyes adjust to the darker landscape of scriptures and particularly the dark places within ourselves, you are likely to see that it's not as dark as you first imagined. In fact someone is there waiting for us, a bit like a light who shines in the darkness, even if the darkness cannot understand it.

Blessed darkness to us as we await the light of Lent.
